FOR IMMEDIATE RELEASE

Calumet Electronics Expanding North American PCB Production

CALUMET, MI: PCB Manufacturer - Calumet Electronics Corp. (CEC) announces 22,000 square foot expansion to its production facility and capital equipment additions scheduled for a January 1, 2007 completion date.

Due to growing demand for its circuit boards, CEC has started construction of the 6th addition to its production facility in as many years. The current expansion increases the facility to approximately 120,000 square feet and will house enhanced Drill, Multilayer Processing, Electrical Test, and Final Inspection Departments. The expansion will improve capabilities and increase capacity.

"Growing demand for our boards from the commercial and military markets has prompted this latest expansion that will ultimately amount to a capital investment exceeding \$2,000,000 this year alone" states Elden Hendrickson, Jr., CEC's General Manager, "We are committed to manufacturing 100% per of the boards we sell in house. We do not broker or sub-contract any products or services – it's all Made in the USA."

CEC is funding this project, as it has funded all previous projects, from its operating revenue. The facility and all the equipment is owned, debt-free, by the company. Dunn & Bradstreet rates CEC's financial strength at 4A1. D-U-N-S® Number: 05-054-6225.

Calumet Electronics Corp.

For 38 years, Calumet Electronics has been setting the standard of excellence for printed circuit boards. By consistently providing customers with friendly, detail-oriented service and the highest level of quality and performance, Calumet Electronics has built one of the most successful circuit board shops in North America. Their Quality System is registered to ISO9001:2000 and certified by the Department of Defense to the Military Performance Specification for Printed Circuit Boards; MIL-PRF-31032. Calumet Electronics is also a certified [HUBZone Small Business](#) by the SBA. For more information, please visit; www.calumetelectronics.com
